## **Work Experience**

## Split Second Software Services · Internship

Mar 2024 - July 2024

- Developed dynamic, feature-rich web applications using Laravel for backend operations and Vue.js for front-end interfaces, ensuring seamless user experiences.
- Built reusable Vue components and implemented efficient state management with Vuex, following best practices for maintainable and modular code
- Integrated Laravel Inertia.js to create SPA-like (Single Page Application) functionality without compromising on SEO and performance.
- Enhanced UI elements and interactivity using Vue transitions, Tailwind CSS, and third-party libraries to provide a polished user interface.
- Leveraged Laravel Livewire for real-time interactivity, improving data handling in complex forms and dynamic components.

## **Educational Background**

## **Bachelor of Science in Information Technology**

AMA Computer Learning Center College of Bukidnon Sep 2022 - July 2024

- · Web Development
- Arduino
- App Development
- Networking

## **Bachelor of Science in Information Technology**

Central Mindanao University Aug 2018 - July 2022

· Web Development

#### **Skills**

#### **Technical Skills**

- · Financial Analysis
- · Budgeting and Forecasting
- · Risk Management
- Data Analytics
- ERP Systems Implementation

#### Tools/Sofware

- Laravel
- Vue
- Inertia
- Tailwind CSS
- Java

#### Languages

- English
- Tagalog
- Bisaya

#### **Certification/Short Courses**

- · Programmer of the Year
- DICT Programming Diagnostic Examination Passer
- DICT JAVA Programming Bootcamp (COC)

#### **Additional Information**

- ICT Week Programming Champion (2024)
- ICT Week Programming Champion (2023)
